Dear Maumee Valley Growers,

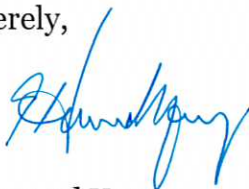

I wanted to send a personal note of appreciation to you for your commitment for joining me and others in the fight against pancreatic cancer.

You see, I have a personal and vested interest in this cause. Nine years ago, I heard the words that one is never prepared to hear: you have pancreatic cancer. As a 42 year old husband and father of three daughters, living an active lifestyle, I had no idea how my life would change.

As I began the battle against the disease, I had the opportunity to meet an extraordinary oncologist, Dr. Daniel Von Hoff, TGen's Physician-in-Chief and world renowned expert on pancreatic cancer. Unlike many patient stories you hear about pancreatic cancer, I am a survivor. I have personally benefitted from the research that TGen is conducting on this disease and in December of this year, I will celebrate nine years since I was diagnosed. Others like me are also benefitting from the research of Dr. Von Hoff and his team. We are living our lives to the fullest, with the hope and confidence that a cure for this disease is no longer a dream, but within reach. I am truly inspired by your commitment to globalCure.

On behalf of all patients like me, and their families, thank you again for supporting TGen's efforts to not only raise awareness about the disease, but to cure it once and for all. I am profoundly grateful.

Sincerely,

E. Howard Young
President
